8. Ethical Hacking

9. Editing (AE)

LANGUAGES

English – native proficiency

Hindi – native proficiency

Marathi – elementary proficiency

Japanese – Still Learning

EXPERIENCE

Project MatrixxOS an AOSP Rom for Realme x7 Max 5G

Project Matrixx OS aims to develop a cutting-edge operating system designed for flexibility, scalability, and enhanced user experience. It focuses on modular architecture, allowing users to customize their environments based on specific needs. Key features include:

1. User-Centric Design: Intuitive interface tailored for both casual and power users.

2. Modular Components: Users can add or remove functionalities seamlessly.

3. Robust Security: Advanced security protocols to protect user data and privacy.

4. Cross-Platform Compatibility: Smooth operation across a variety of devices, from desktops to mobile.

5. Developer-Friendly Tools: Comprehensive SDKs and APIs to foster innovation and third-party application development.

The goal of Matrixx OS is to create a versatile and user-friendly platform that meets the demands of a diverse user base while encouraging community-driven enhancements and contributions.
